

Ajout Proxy

Il faut mettre le script sous /etc/profile.d/proxy.sh

```
PROXY_URL=http://adresseip:port/  
export http_proxy="$PROXY_URL"  
export https_proxy="$PROXY_URL"  
export ftp_proxy="$PROXY_URL"  
export no_proxy="127.0.0.1,localhost"
```

Puis il faut exécuter :

```
source /etc/profile.d/proxy.sh
```
