

Verifier le issuer du certificat

```
$r = [Net.HttpWebRequest]::Create("https://enrollment.manage.microsoft.com/")  
$r.GetResponse() | Out-Null  
$r.ServicePoint.Certificate.Issuer
```

Le résultat attendu : un émetteur **Microsoft**. Si l'on voyait la CA interne, l'exception ne s'appliquerait pas.

```
PS C:\Users\<redacted> > $r = [Net.HttpWebRequest]::Create("https://enrollment.manage.microsoft.com/")  
$r.GetResponse() | Out-Null  
$r.ServicePoint.Certificate.Issuer  
CN=Microsoft TLS G2 RSA CA OCSP 04, O=Microsoft Corporation, C=US
```
